ACEC Nominates AECOM's Thomas Cascino to its Executive Committee

Washington, DC - The American Council of Engineering Companies (ACEC)—the business association of the nation's engineering industry—is pleased to announce that Thomas Cascino, P.E., has been nominated to serve as a 2022-2024 Vice-Chair of the Board of Directors.

"I'm pleased that Tom Cascino has been nominated to serve as a Vice-Chair," said ACEC Chair Robin Greenleaf. "Tom is a proven leader in the engineering industry and has served with distinction at the state level in one of our most active Member Organizations. His experience will benefit the Council as we work to expand our voice in Washington and beyond."

Cascino is a Vice President at AECOM in Latham, NY. AECOM is a multinational engineering firm with approximately 87,000 employees and is the second-largest engineering firm in the U.S. Cascino leads the firm's upstate New York transportation business practice, covering all transportation design and construction management services.

He served as Chair of ACEC New York in 2019-2020. He has also served on the ACEC New York Board of Directors and Executive Committee, on five committees—including as chair for three of those committees—and as the Eastern Region Chair.

Cascino is a graduate of the United States Military Academy at West Point. He has been with AECOM for more than 21 years. Prior to that, he worked in federal, state, and local governments.

###

The [American Council of Engineering Companies](#) (ACEC) is the business association of the nation's engineering industry. Founded in 1909, ACEC is a national federation of 52 state and regional organizations representing more than 5,500 engineering firms and 600,000+ engineers, surveyors, architects, and other specialists nationwide. ACEC member firms drive the design of America's infrastructure and built environment.
