## **National Engineering Association Nominates Ralph Guida, IV, to its Executive Committee**

Washington, DC - The American Council of Engineering Companies (ACEC), the business association of the nation's engineering industry, is pleased to announce that Ralph Guida, IV, has been nominated to serve as a 2022-2024 Vice Chair of the Board of Directors.

"The leadership Ralph Guida has provided to ACEC over the years is invaluable, and I am grateful his service will continue as a Vice Chair," said ACEC Chair Robin Greenleaf. "Ralph has business, operations, and managerial skills that will serve the organization well."

Guida is a registered Professional Land Surveyor (PLS) and president and founder of Guida Surveying, Inc. in Irvine, California. He will bring 36 years of surveying experience to the position, and as a second-generation surveyor, taking an active role in supporting the future of the industry has always been a priority for him.

Guida has been involved in the American Council of Engineering Companies (ACEC) for more than 17 years, having served as Chapter President, State Organization President, Steering Committee Member, and Chair for the Coalition of Professional Surveyors (COPS). He is also a participant in the ACEC National Political Action Committee and has served as National Director for ACEC California.

Guida was unanimously inducted by his colleagues into the ACEC College of Fellows at its Fall Conference last month. This honor is granted to a distinguished class of engineering and land surveying professionals, in recognition of their contributions to the Council and the profession.

###

The [American Council of Engineering Companies](#) (ACEC) is the business association of the nation's engineering industry. Founded in 1909, ACEC is a national federation of 52 state and regional organizations representing more than 5,500 engineering firms and 600,000+ engineers, surveyors, architects, and other specialists nationwide. ACEC member firms drive the design of America's infrastructure and built environment.
